

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, July 18, 2018 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial Attack Activity: Moderate (243) new fires
 New large incidents: 9
 Large fires contained: 13
 Uncontained large fires:** 44
 Area Command teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 3
 Type 2 IMTs committed: 5

Nationally, there are 20 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

The U.S. has mobilized 12 federal wildland firefighters to support fire suppression efforts in Ontario, Canada.

Dollar Ridge, Northeast Area, Utah DOF. Transfer of command from IMT 1 (DeMasters) to IMT 2 (Bird) will occur today. Thirty-six miles southeast of Heber City, UT. Timber, brush and tall grass. Minimal fire behavior with isolated torching, creeping and smoldering. Numerous residences threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

* **Dog Creek**, Twin Falls District, BLM. Eight miles northwest of Gooding, ID. Brush and short grass. Extreme fire behavior with short-range spotting and running. Structures, energy infrastructure and sage-grouse habitat threatened. Road closures in effect.

* **Winter Camp**, Twin Falls District, BLM. Thirty-nine miles south of Glenns Ferry, ID. Brush and short grass. Extreme fire behavior with short-range spotting and running. Structures and sage-grouse habitat threatened.

Berger Butte, Twin Falls District, BLM. Twelve miles south of Buhl, ID. Brush and short grass. Active fire behavior with running, short-range spotting and backing. Structures, energy infrastructure and sage-grouse habitat threatened.

West Duck, Boise District, BLM. Fifteen miles southwest of Riddle, ID. Brush and short grass. Active fire behavior with running and flanking. Sage-grouse habitat threatened.

Lodgepole, Boise NF. Sixteen miles northeast of Garden Valley, ID. Timber, brush and tall grass. Active fire behavior with torching, flanking and creeping. Structures threatened.

Garat, Boise District, BLM. Twenty miles west of Riddle, ID. Brush and tall grass. Active fire behavior with running, flanking and backing. Sage-grouse habitat threatened.

Otter, Boise District, BLM. Six miles east of Riddle, ID. Brush and short grass. Moderate fire behavior with running, flanking and backing. Residences and sage-grouse habitat threatened.

East White, Boise District, BLM. Thirty miles south of Mountain Home, ID. Brush and grass. Moderate fire behavior with backing, flanking and creeping. Sage-grouse habitat threatened.

Stag, Elko District Office, BLM. Twenty-six miles northwest of Wells, NV. Brush and tall grass. Minimal fire behavior. Structures and sage-grouse habitat threatened.

* **Red Road**, Eastern Idaho Area Office, IDL. Twelve miles northwest of St. Anthony, ID. Brush and short grass. Moderate fire behavior with creeping and smoldering. Sage-grouse habitat threatened.

West Valley, Dixie NF. Ten miles north of St. George, UT. Timber, chaparral and brush. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Trail Mountain, Manti-La Sal NF. Fifteen miles northwest of Orangeville, UT. Timber and brush. Minimal fire behavior. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

Hogan, Elko District Office, BLM. Twenty-five miles southeast of Wells, NV. Timber, brush and short grass. Minimal fire behavior.

Martin, Humboldt County. Four miles northeast of Paradise Valley, NV. Brush and grass. Minimal fire behavior.

Predictive Services Discussion: Very hot conditions will continue across the West as the high pressure ridge over Nevada maintains its strength. Monsoonal convection will once again begin working its way north along the Sierras spreading storms as far north as Lake Tahoe. Meanwhile a back door cold front will bank itself up against the Continental Divide in Montana and Wyoming and will serve as a focus point for afternoon and evening scattered convection. Northeasterly flow will be present across the northern Great Plains as a result. In the East, a cold front extending south along the Atlantic Coast and across the Deep South will allow for the development of afternoon storms along the Atlantic and Gulf Coasts. Central and South Texas will remain hot and dry which will allow for continued drying of the fuels. In Alaska, high pressure ridging along the Yukon Border will lead to warm and dry conditions across the northeastern Interior.

Initial Attack Sizeup/Safety

Operational Engagement Category

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting. Use the following reporting factors for size-up and reference local fire size-up cards. Discuss others that may be used.

- Fire name and location
- Terrain (slope, aspect, elevation) and position of fire on the slope
- Size of fire
- Fuel type, anticipated control problems, and spread potential
- Values threatened
- Weather conditions (wind speed and direction)
- Fire behavior
- Resources on the fire and those needed
- Estimated containment and control times
- Cause (known, suspected, under investigation)

After your initial size-up of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.

- Have you sized up the fire and relayed the information to dispatch?
- Is the observed fire weather consistent with the forecast?
- Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
- Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
- Are lookouts in place or can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Do you have a complete list of what resources have been ordered for the fire?
- Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
